

# Journeyman Electrician

## Job description

It's On Electric Company is a full-service electrical contracting and energy management company. We are currently seeking a keen and eager journeyman electrician to assist on a variety of residential energy saving projects for BC Hydro and FortisBC . Some commercial service may be required. Must have a strong passion for working everyday to better the environment through electrical work that promotes energy efficiency.

Areas worked in will include the Lower Mainland, Fraser Valley and Fraser Canyon (Hope).

### Duties include:

- Installation of residential EV chargers
- Residential Load calculations
- Basic home energy assessments to determine largest load draws (will train the right candidate)
- Installation of energy saving smart devices in homes, and connection to wifi as required. (Smart thermostats, Load controllers, Smart switches/dimmers, TLED etc)
- Providing customer education - energy saving tips
- Various other commercial and residential electrical support as required by the team.

### Must have the following qualifications:

- Redseal or TQ (If you are not legally able to work in BC as a journeyman electrician you will not be considered)
- Excellent customer service and communication skills.
- Ability to trouble-shoot electrical and lighting systems
- Be tech savvy - wifi networks and connectivity
- Be open-minded, passionate and trainable
- Ability to work independently, take directions, and work as part of a team.
- Have a passion for saving energy
- Excellent paperwork (physical and electronic), note tracking, and be detailed oriented.
- Class 5 Driver's License with a clean driving record
- Must pass a criminal record and background check.

We will provide the right candidate with training on our systems and what we do, as well as with a vehicle (take-home), tools and equipment, cellphone/iPad, uniform and everything that you will need to do the job! :)

This position is best suited for a keen, "green", socially conscious, tech savvy, forward thinking electrician.

Ideally, this is a FT salaried position, but we will consider a part-time hourly applicant.

**Job Types:** Full-time, Permanent

**Salary:** \$35.00-\$37.50 per hour
